- Adobe Photoshop CC and Lightroom

PROJECTS

Fotoshoppe

Github: <https://github.com/vlad916/fotoshoppe> | Live: <https://fotoshoppe917.herokuapp.com/products>

- A photo equipment rental application where the user is given the option to create an account by signing up and then signing in to the app. The user is also given the option to browse the equipment by page, by category (e.g Camera Body, Lenses, Flashes), or sort the equipment by ascending and descending order.
- Technology: MongoDB, ExpressJS, ReactJS, NodeJS, Github, Bootstrap, HTML, CSS, Javascript, Lodash, JsonWebToken(JWT), Joi, Prop-types.
- Role: Front End + Back End Development + App Design

Game of Thrones: The Fandom Zone App

Github: <https://github.com/vlad916/GOT-WEBPAGE> | Live: <https://nicolegeorge.github.io/suicide-squad-GoT-app/>

- An app that will appeal to their newer fans as a way to research their favourite character and register for the competition.
- Technology: The Open Movie Database - API to fetch T.V data [OMDb API](#), An API of Ice And Fire - A Game of Thrones fan API to fetch character data [API website](#), Foundation CSS Framework, GIPHY, Javascript/JQuery, HTML, Visual Studio Code, Github
- Role: Back End Development + Testing [GitHub Profile](#)

Shoe Shop | Github: <https://github.com/vlad916/shop>

- A shoe store app that allows users to login as members using passport and search for shoes listed in the stores database. When the user finds shoes they want to purchase they can add shoes to the cart and continue checkout. User/Member information will be saved into the shops database to be used to keep track of their purchases.
- Technology: Passport, Brcrypt, Handlebars, Sequelize, JavaScript, CSS Bootstrap and HTML, MYSQL Database & Seeders.
- Role: Handlebars + App Design
